

the 1990s, the number of people in the UK who are aged 65 and over has increased from 10.5 million to 12.5 million, and the number of people aged 75 and over has increased from 4.5 million to 6.5 million (Office of National Statistics 2000). The number of people aged 65 and over is projected to increase to 15.5 million by 2020, and the number of people aged 75 and over to 8.5 million (Office of National Statistics 2000).

There is a growing awareness of the need to develop strategies to meet the needs of older people, and to ensure that they are able to live independently and actively in the community. This has led to a number of initiatives, including the development of age-friendly communities, and the establishment of age-friendly networks. These initiatives aim to create environments that are accessible, safe, and supportive for older people.

One of the key challenges in developing age-friendly communities is to ensure that the needs of older people are taken into account in all aspects of community planning. This includes the design of public spaces, the provision of services, and the development of policies and procedures. It is essential to involve older people in the planning process, and to ensure that their views are heard and acted upon.

Another challenge is to ensure that older people have access to the services and facilities that they need. This includes access to housing, transport, and social services. It is important to ensure that these services are accessible, affordable, and of high quality. This may involve the development of new services, or the improvement of existing ones.

Finally, it is important to ensure that older people are able to participate in the community and to contribute to its well-being. This may involve the development of opportunities for older people to volunteer, or to participate in community activities. It is important to ensure that these opportunities are accessible, and that older people are encouraged to take part.

There are a number of factors that can influence the ability of older people to live independently and actively in the community. These include physical health, mental health, social support, and financial resources. It is important to address these factors in order to ensure that older people are able to live well in the community.

One of the key ways in which older people can live well in the community is by having access to a good network of social support. This can include family, friends, and neighbours. It is important to ensure that older people have access to this support, and that they are able to maintain and strengthen their relationships.

Another way in which older people can live well in the community is by having access to a good network of services and facilities. This includes access to housing, transport, and social services. It is important to ensure that these services and facilities are accessible, affordable, and of high quality.

Finally, it is important to ensure that older people are able to participate in the community and to contribute to its well-being. This may involve the development of opportunities for older people to volunteer, or to participate in community activities. Mr. Michael Zoladz passes away

Mr. Michael Zoladz, HHS woods teacher since 1980, passed away Monday, May 8, 2006, after a two and a half month battle with brain cancer. Mr. Zoladz was diagnosed with the illness the last week of February, which was also his last week teaching at HHS. His survivors include his sons, Seniors Christopher and Shaun Zoladz; and his wife of 24 years, Mrs. Randa Zoladz.

Mr. Zoladz was a lifelong Hobart area resident, having graduated from River Forest High School in 1976 and Ball State University in 1980. He received his bachelor of science degree in industrial arts from BSU, and then went on to receive his master's degree from Indiana University Northwest. He also received his state certification in industrial technology and his vocational license in furniture and cabinet making.

A celebration of Mr. Zoladz's life was held Saturday, May 20, in the HHS auditorium. Hundreds of people attended the two-hour service, which included memories from administrators, teachers, relatives, and friends.

"In my experience, Mr. Zoladz was always the voice of reason. After everyone else had his or her say on a matter, and the atmosphere became rather heated or confrontational, he would say a few calming words that seemed to defuse the situation. He didn't talk much, but when he spoke, we tended to listen," said Mrs. Vera Cory.

"I took a woodworking class that was taught by Mr. Z. He helped me make a cabinet for my bathroom. It was great fun, and I learned a great deal about woodworking. I will cherish that cabinet and the time spent working with Mr. Z always," said Mrs. Alice Cope.

"The thing that I admired about Mr. Z the most was his ability to speak volumes without saying a word. He never had to verbally say he was a Christian. The way he lived his daily life spoke 'I am a Christian' to every heart he came in contact with. He never had a negative word to say about anything or anyone. He had a true passion for loving people, no matter the circumstances they may be facing," said Mrs. Tiffeni Taylor.

"The kids loved him. The fact was never more evident than it was during his illness. The outpouring of love they extended to him was heartwarming. Even in his own trials and illness, he was concerned about them. He continued to counsel them to do their best and to be good citizens and to accomplish their dreams. The students were touched by his love for them," said Mrs. Barbara Shinovich.

At the annual student-faculty basketball game, Mrs. Heidi Krouse, new science teacher, and Mrs. Cathy Nelson, theater teacher, show the fans what they are made of.

Mr. Michael Zoladz, along with Mr. Steve Balash and Mr. Don Rogers, awaits the signal to begin the official groundbreaking shoveling.

DANCES

Students boogie, oogie, oogie

HHS students didn't get a choice of many dances to attend during the year, but many of them took advantage of what dances there were to have a good time.

The middle school gym was the scene of the traditional Football Homecoming dance, while the HHS cafeteria was the place to go for the Basketball Homecoming dance, both of which were

sponsored by Student Council.

Of course, the annual semi-formal, sponsored by the National Honor Society, proved to be very popular, since all students could attend.

"Crystal Fantasy" was the theme of the dance, which

was again held at the Croatia Center in Merrillville. The decorations included blue and silver balloons and a castle. The students danced to music from "Express."

Although the Key Club dance was held at the community center, with a theme of the 1980s, many students enjoyed dressing the time period and rocking to the music from the decade too.

"The semi was tons of fun to be with your friends. Plus, it was fun to dress up."

With 41 years of teaching altogether

After 34 years at HHS, Mr. Robert Graham retires

Mr. Robert Graham, Business Law, Business Math, Accounting, Computer Applications and Business Foundations teacher, retired in June after 41 years of teaching.

Mr. Graham began teaching at Liberty Township High School in 1965, after graduating from Ball State University with a bachelor of science degree in education. He taught at Liberty for three years before moving on to Morgan Township High School, where he stayed for four years. Then he came to HHS where he taught for 34 years.

Mr. Graham stated that at first he wanted to become a teacher only to become a coach for basketball, but then later, he wanted to teach in hopes that he would give students the tools to make good decisions with their money. While at HHS, Mr. Graham also sponsored Fellowship of Christian Athletes (FCA) and Key Club, and coached basketball.

"The worst time teaching that I've had would be when students exhibited horrible attitudes and work ethics. The best times I've had are teaching Business Law, Accounting, and Business Foundations," Mr. Graham said.

He stated that the respect, language, and

work ethics of students have deteriorated greatly since he began teaching, but that looking back, he explained that there is no other profession he would have rather done. "God gave me the talent, ability, and desire to teach."

He also noted that Business Law was his favorite class to teach, and that the mock trial in the Business Law class in 2003 was one of his favorite memories. "The lawyers in the mock trial were awesome!"

When asked why he decided to retire this year, Mr. Graham stated, "Forty-one years is a long time, and I'm tired of grading papers." He also commented that after colon cancer surgery earlier this school year, he experienced a physical wake up call.

Over the years, technology has been the one thing that Mr. Graham thinks has changed the most since he began teaching. Also, in order to become a good teacher, he said, "You must be a teacher, disciplinarian, and an entertainer."

Mr. Graham explained that he would miss the faculty, leadership staff, and 95 per cent of the student body. "My 41 years of teaching have been great. The memories and relationships will never be forgotten. I pray that I have made a difference."

Members of Mr. Bob Graham's family pose for a picture before going to the faculty year-end luncheon honoring the retirees.

At the luncheon honoring the teachers who retired, Principal Dave Spitzer relates his experiences with Mr. Bob Graham, business teacher at HHS for 34 years.

Organizations

2006 Club Actions

The Fellowship of Christian Athletes (FCA) came back to HHS after a two-year absence. Mr. Darrin Cline and Mr. Ty Artherhults took over the sponsorship of the club. Also, Mrs. Stephanie Waldron joined Mr. Doug Klukken in sponsoring Student Council due to Mrs. Christina Degenhart's maternity leave. DECA succeeded in having Senior Jennifer Imboden proceed to na-

tionals in Dallas, Texas.

Unfortunately, due to Mrs. Diane Lawrence's retirement last year and the administration not being able to find a replacement, there was not a Home Economics Club and no home economics classes. Also, Mrs. Barbara Shinovich spent her last year as Spanish Club sponsor before retiring in June.

Senora Shinovich retires after 37 years at HMS, HHS

Mrs. Barbara Shinovich, HHS Spanish and junior gifted and talented teacher for the past 22 years, retired from HHS. She also taught Spanish at the middle school for 15 years and was the Spanish Club sponsor.

Mrs. Shinovich decided to retire since her husband, Mr. Jim Shinovich, was also retiring. Mr. Shinovich was the coordinator of the gifted and talented program for grades second through fifth. He traveled to all Hobart elementary schools and taught problem solving to all children.

Mr. and Mrs. Shinovich plan to travel, enjoy fun activities together, and pursue some personal interests.

Mrs. Shinovich received her bachelor of arts and master of arts degrees in Spanish, along with her teaching certification while attending Indiana University in Bloomington.

While she was finishing her master's at IU, Mrs. Shinovich was recruited to Purdue University in West Lafayette to teach Spanish. After a year of teaching at Purdue, she left to get married. At Purdue she received a Certification in Gifted and Talented Education for grades kindergarten through 12th.

One of the many reasons why Mrs. Shinovich decided to go into teaching was that she said she loves to learn languages. During her assistantship at Indiana University, Mrs. Shinovich was required to teach in an observation room. "I had to be constantly creative, so others could learn different techniques," stated Mrs. Shinovich.

Throughout her teaching experiences, Mrs. Shinovich said she never had a bad one. "There have been days that were harder than others, but I have not had a worst experience."

However, Mrs. Shinovich feels she has had many great experiences at HHS. One of the best she has had is being able to meet and work with wonderful people, such as fellow teachers, students, parents, and administration. Mrs. Shinovich also enjoyed teaching Spanish and Hispanic culture to others.

Over her years of teaching, Mrs. Shinovich believes that students have changed. She feels students technologically have become more knowledgeable and worldlier because of their access to the Internet and worldwide knowledge.

Mrs. Shinovich also feels that along with the change in students, there has been a change in teaching. "It has become much more complex because of computers, Internet, instant communication, email, websites, PowerPoint, and many other computer programs."

Some of the many memories that Mrs. Shinovich said she will always hold dear to her heart include working on homecoming floats, her annual trips to Chicago with the foreign language clubs, going to ethnic restaurants with students and introducing them to new foods, music, art, and dances.

During her years of teaching in Hobart, Mrs. Shinovich said she realized how much the faculties are like extended family to her. She will miss the people, both fellow colleagues and students, along with the camaraderie.

Mrs. Shinovich feels that teaching has been extremely rewarding for her. "I was constantly learning something new everyday and can easily say it has been a joy to teach in Hobart. Seeing the accomplishments of my students has been most rewarding to me," commented Mrs. Shinovich. "I would like to thank everyone for 37 wonderful years in Hobart!"

For any students that are considering teaching as a career, Mrs. Shinovich believes that you will need a tremendous amount of patience and stamina, and be willing to keep up with latest trends in the field of education. "It is not a 7:30 a.m. to 2:30 p.m. job. Much of your work is outside of the classroom."

Senora Barbara Shinovich (from top to bottom) prepares for the Foreign Language Honorary's annual breakfast, addresses the Class of 2006 at commencement, and is roasted by her friend and colleague, Mrs. Debbie Olejniczek, at the faculty luncheon.

Aren't you the little ones
That hid in our arms afraid of the thunder
Are these the little hands that held so tight to ours?
Didn't we all agree that you'd never grow up
Now here you are, and here you go
Of all the things we want to say and what we really
want you to know is...

We believe in you
Everything you are, everything you are becoming
We believe in you
So spread your wings and fly on the winds of knowing
We will *always* believe in you.

So many prayers we've prayed
so many dreams to get to this moment
Now this is where we stay while you go chase the world
But we'll be where we've always been
Up in the stands cheering you on and singing a song
The song the very God who made you has been
singing all along.

We believe in you
And when you rise and when you fall
We'll still believe in you
Just close your eyes and hear us calling
WE BELIEVE IN YOU!

We love you so much,
Mom and Dad

*This time has come much too fast,
Looking forward to tomorrow yet cherishing the past.
We will never forget that Christmas morn,
When you stole our hearts the moment you were born.
You were first our baby, then our little boy, now a man.
Our prayer for your future is that you follow God's Plan.
You've accomplished so much in these 18 years,
Earning love and respect from your family and peers.
You maintained your character and integrity too,
Despite life's temptations, to yourself you stayed true.
It's not going to be easy, it will truly be tough,
One when it comes to being a "GROWN" son.
You have the right stuff
The words to express how you make us feel inside -
In love and respect, joy and pride.
So it's off to TV as parents of you dream,
Just remember "Bread & Lard" - you know what we mean!*

Our love and support forever.

The first part of the paper discusses the importance of understanding the underlying mechanisms of the observed phenomena. This is followed by a detailed analysis of the data, which shows that the results are consistent with the theoretical predictions. The final section concludes the paper by summarizing the findings and suggesting directions for future research.

The data analysis reveals that the observed trends are not statistically significant at the conventional levels. However, the theoretical model provides a plausible explanation for the observed patterns. The model suggests that the underlying mechanisms are more complex than initially thought, and further research is needed to clarify the exact nature of the relationships.

In conclusion, the paper highlights the need for a more comprehensive understanding of the underlying mechanisms. The findings suggest that the current theoretical framework may be incomplete, and future research should focus on developing more robust models that can better explain the observed phenomena.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.1 million (Office for National Statistics 1999). The number of people aged 65 and over is projected to increase to 6.5 million by 2010, and the number of people aged 75 and over to 3.5 million (Office for National Statistics 1999).

There is a growing awareness of the need to develop services to meet the needs of older people, and a number of initiatives have been developed to address this need. The Department of Health (1999) has published a strategy for older people, which sets out the government's commitment to improve the lives of older people. The strategy is based on three main principles: (1) to ensure that older people have the opportunity to live independently and actively; (2) to ensure that older people have access to the services and support they need; and (3) to ensure that older people are treated with respect and dignity. The strategy is being implemented through a number of initiatives, including the development of new services, the improvement of existing services, and the promotion of good practice.

One of the key initiatives is the development of new services to meet the needs of older people. This includes the development of new housing, new health services, and new social services. The government is also investing in the improvement of existing services, such as the development of new care homes and the improvement of existing care homes. The government is also promoting good practice, such as the development of new standards for care homes and the promotion of good practice in care homes.

The first part of the paper discusses the importance of the research and the objectives of the study. It then presents a literature review of the existing research on the topic. The second part of the paper describes the methodology used in the study, including the data sources and the statistical techniques employed. The third part of the paper presents the results of the study, which show that there is a significant positive relationship between the variables studied. The final part of the paper discusses the implications of the findings and suggests areas for further research.

the 1990s, the number of people with a mental health problem has increased by 50% (Mental Health Foundation 1999).

There is a growing awareness of the need to address the needs of people with mental health problems. The vision is based on the following principles:

- People with mental health problems should be able to live full and meaningful lives.
- People with mental health problems should be able to contribute to society.
- People with mental health problems should be able to live in their own homes.
- People with mental health problems should be able to live in their own communities.
- People with mental health problems should be able to live in their own families.

There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The Department of Health (1999) has published a strategy for ageing, which sets out the government's commitment to improve the health and well-being of older people. The strategy is based on three main principles: (1) to ensure that older people have access to the services they need; (2) to ensure that older people are able to live independently; and (3) to ensure that older people are able to participate in society.
